Investment Information

Investment Objective & Strategy from investment's prospectus
The investment seeks long-term capital appreciation.

The fund normally invests at least 80% of its total assets in stocks of small capitalization ("small cap") companies. It invests primarily in a diversified portfolio of equity securities, including common stocks and other forms of equity investments, issued by foreign small cap companies, that the advisor believes have above-average growth, profitability and quality characteristics. The fund's investments are normally allocated among at least six different countries and no more than 50% of the fund's equity holdings may be invested in securities of issuers in one country at any given time.

Category Description: Foreign Small/Mid Growth

Foreign small/mid-growth portfolios invest in international stocks that are smaller, growing faster, and higher-priced than other stocks. These portfolios primarily invest in stocks that fall in the bottom 30% of each economically integrated market (such as Europe or Asia ex-Japan). Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). These portfolios typically will have less than 20% of assets invested in U.S. stocks.
